+62 887 1729 638 | andikacrwork@gmail.com | Jakarta, Indonesia

---

## ABOUT ME

I'm Andika Cahya Rahman. I have a strong interest in programming and am always excited to learn new things, both academic and non-academic, especially in areas that I have not yet mastered. I have solid skills in web development, particularly in front-end technologies such as React.js, Tailwind CSS, and modern JavaScript. In addition, I am highly interested in cybersecurity and actively practice penetration testing to deepen my understanding of system security. I am always eager to expand my knowledge and continuously improve my skills.

---

## WORK EXPERIENCE

July 2025 - January 2026

Data Entry (Internship) - PT. Elnusa Fabrikasi Konstruksi

- Process and validate data from the CMMS system.
- Prepare and maintain work recap reports.
- Provide support for other operational tasks as required.

---

## EDUCATION

Vocational High School State 65 Jakarta

July 2023 - May 2026

Major in Software Engineering

---

## PROJECT

### Saku Siswa

Saku Siswa is a website that helps students manage their finances effectively. The platform provides detailed financial reports, allowing students to monitor their expenses, track spending patterns, and better control their money.

Link: <https://github.com/kuroshii251/Saku-Siswa.git>

### Web Portfolio

This web portfolio project was developed using React.js and Tailwind CSS. I built it to showcase my skills in modern front-end development, focusing on responsive design and unique user interfaces. Through this project, I also learned more about component-based architecture and how to manage styles effectively using Tailwind. The website highlights my previous projects, demonstrating my creativity, coding abilities, and attention to design details.
